## Overview

Wearhouse is a mobile application compatible with both Android and IOS.

In world where everything is digitalized, for the first time ever, Wearhouse brings to us our digitalized closet.

So, here's what the app does, you get to upload your clothes in the categories provided by the app like Topwear, Bottoms, Westernwear, Indianwear, Spots, Lingerie & Sleepwear, Footwear and Accessories. Once you're done uploading the all the clothes the app automatically designs and pairs various outfits from your own closet keeping in mind all the latest trends and styles.

So now pairing outfits for events or even just for the day becomes a hassle-free job. It has many other fascinating features that I will be elaborating upon further down below.

The app is very user friendly and can be easily accessed by anyone from any age group. The UI is intuitive, clean and simple. Just click on the '+' icon at the bottom right, click the picture of the clothing item, the app itself will clear out the background. Now you get a few categories to fill in describing your clothing like, is it a topwear, a bottomwear? If a top, is it a t-shirt or a hoodie? You also get to include the Colour, Brand, Price and any specific notes that you would like to add. And now your clothing items get organised automatically according to the categories filled by you. And within a few minutes, your entire wardrobe will be at the tap of your fingers.

## 2. Outfits

Now that you have a digitalized closet, using the outfits feature you can easily pair and choose outfits at the tap of your fingers. No more glancing at your closet to no avail for ages. With suggestions from the app pairing an outfit becomes a piece of cake.

## 3. Suitcase

Planning a trip, but packing still left? To know exactly what to put in that suitcase, the feature will help you pick outfits for the trip according to the place and the itinerary.

## 4. Calendar

The Calendar feature on Wearhouse, manages your outfits well in advance according to the events for the days. It makes sure you never need to repeat your outfits frequently. It's like an outfit tracker.

## 5. Wish list

You can add clothes to the wish list like a future buying list and how they would suit your wardrobe.

## 8. Style Stats

Provides stats regarding the types of clothes you own, what brands, colours, etc.

## 9. Suggest a Change

The app is open to changes suggested by the users, and will be implemented accordingly.

The 'Suggest a Change' app interface features a dark background. At the top, there is a back arrow and the title 'Suggest a Change'. Below the title, the text reads 'What changes would you like to see in the app?'. A large, empty text input field is provided for user suggestions. Below the input field, the text reads 'How would you rate the overall app'. A star rating system is displayed, with five stars and a '5.0/5.0' rating. At the bottom, there is a 'Submit' button.
